

Number: Addition and Subtraction

NUMBER BONDS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and						
Within 20	use related facts up to 100	MENTAL (CALCULATION				
add and subtract one- digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers	add and subtract numbers mentally, including: * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds	ALCOLATION	add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers		
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)	show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot				use their knowledge of the order of operations to carry out calculations involving the four operations		

Number: Addition and Subtraction

WRITTEN METHODS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)			
	INVERSE OPERATIONS, ESTIMATING AND CHECKING ANSWERS						
	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.		

Number: Addition and Subtraction

PROBLEM SOLVING							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations,	solve problems with addition and subtraction: * using concrete objects and pictorial representations,	solve problems, including missing number problems, using number facts, place value, and more	solve addition and subtraction two-step problems in contexts, deciding which operations and methods	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and		
and missing number problems such as 7 = □ -9	including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods	complex addition and subtraction	to use and why	why	why		
	solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)				Solve problems involving addition, subtraction, multiplication and division
