

Halle orchestra acoustics

When the band started playing, my ears felt so inspired that it made me want to play. My favourite music was the piece from Avengers. First they played the piece from Avengers, the second was Finlandia, and the third piece was the firebird. I really like the Halle orchestra because they were really friendly, and they let us join in. I also liked how they gave us a scratch and smell. The conductor was called Delyana and the presenter was called Tom Redmond. One of my favourite presenters was Matt, he sang songs with us. The presenter tried to warm us up by doing something that I found really hard so that I can't even explain. I couldn't even keep up with him.

The orchestra was so big that it made me feel like a baked bean. I particularly liked how every one really enjoyed it including me. I thought that it could be more black people so it would be more fair. When we got out my ears felt so quiet that I thought I was deaf!
